Personal Statement

My focus is creating human centered designs that allow people to harness the full power of technology to help solve their problems and actualise their aspirations.

I began my career in the Design sector and switched over into the development world, my ability to learn and apply greatly strengthened my personal resolve and technical execution skills.

I am an experienced Lead Developer with a proven track record of complete customer satisfaction. My ability to adjust the pace of work to meet evolving client needs allows me to adapt to and excel in any environment. Experienced in both working independently and as part of a team. I am currently residing in Johannesburg South Africa and looking to return to the UK to be apart of your amazing team.

Work Experience

Barclays Africa Group Limited / Absa Capital CIB (Corporate Investment Banking)
2016 - present

Promoted to Lead Developer: Trade Loans

Lead Developer: Trade Loans
2018
I was solely responsible for the delivery of the Trade Loans Channel and Workflow. Having a limited workforce to assist I had to do most of the developing myself and would be allocated developers once they became free.

- Creating a time-line in which business could have a view on the project velocity via a mixture of AGILE and KANBAN methodologies
- Adding a technical perspective to Requirement gathering sessions with clients out of country thus blocking a potential revenue leakage
- Improvised successfully enough times to be give UX freedom from the Design Department, eliminating our need for their sign off thus saving massive amounts of time.
- Coordinating code deployments across various team across 4 countries

First successful deal took place on 24th September for $1.5 million

UX Developer / Software Engineer
2017
Corporate Technology
Trade Management Channel

Inspired by the Trade Loan: Smart Form, an entire channel was produced allowing

Promoted from Graduate program to join Corporate Technology from the development

Front End Developer
2016
CIB Digital
Trade Loan: Smart Forms

The project was a digitization of an International Trade Loan application form. This would later influence the development of the Trade Management Channel.
